## *Memorandum*

TO : C/GSD

DATE: 27 April 1965

FROM : DAD/S&D

SUBJECT:

I think that the data pertaining to these tests ought to be organized in a slightly different way. For one thing, all the information here could probably be presented in about two graphs. On the graph that has to do with the intercept range, it would be important to put in what the theoretical

upon the height of the mast; this is ignored completely in these tests and should be part of the data all the time. I also think that before tests like these are conducted some estimates should be made of what results are to be obtained. Then we see whether or not we even know how to estimate what the system ought to do in advance.
